1 x 5g of powder,
1 x 5ml bottle of glycerine,
1 x measuring spoon.

• Internal bleaching of non-vital teeth.
• Internal Dentine whitener - 100% carbamide peroxide.
• Progressive whitening

• Peroxide-based powder with bleaching, bactericidal actions.
• Presented in a powder form so can be customized dosage with the glycerine for specific applications.

Canal +
Lubricating Gel for Root Canal Preparation. Water soluble lubricating gel for any root canal instrument.

• Effervescent action helps clean canal automatically.
• Optimizes cleaning of the root canal if used in combination with Parcan irrigation solution, thanks to the effervescent properties of the carbamide peroxide.

R4 Solution
R4 is designed for disinfecting root canals, thanks to its specific effect on the anaerobic strains of the root canal flora and the endoperiodontal lesions.

20% Chlorhexidine-based root canal disinfectant.

Bactericidal spectrum covers all common bacteria found in dentistry (tested on 13 anaerobic bacterial strains).

Largal Ultra
15 % E D T A Chelating agent for the chemical reaming, and cleaning of root canal.

• Very low surface tension so it easily penetrates without mechanical aid

Endoperox
• Internal bleaching of non-vital teeth.
• Internal Dentine whitener - 100% carbamide peroxide.
• Progressive whitening

• Peroxide-based powder with bleaching, bactericidal actions.
• Presented in a powder form so can be customized dosage with the glycerine for specific applications.

Parcan Solution
Canal Irrigation solution for root canal preparation. 3% stabilized solution of highly purified and buffered sodium hypochlorite. CE marked for use in Dentistry.
